

FARMING AND FOOD

Advanced solutions in corrugated polypropylene

FARMING AND FOOD

PACKAGING AND INNOVATIVE SOLUTIONS IN POLYPROPYLENE

Ondaplast offers products in Polionda® and Ondaplaque (respectively, corrugated and solid PP sheets) for **agriculture** and the **food industry** according to ISO 15593 / HACCP.

The applications are vast and continuously growing, ranging from boxes for fruit, vegetables and fish, to shelters for tree crops, and to insect traps.

SECTORS

Shelter: the use of Polionda® with anti-UV additive is widespread in the **cultivation of tree plants** subject to the threat of rodents. Normally a shelter has a useful life of 3-4 years.

Fruit and vegetables: the **boxes for fruit and vegetables** in Polionda® with digital printing are the ideal solution to enhance the products and the brand of any farm. They are also very suitable for all products that can release water

or humidity (e.g. fennel, grapes, salads, etc.)

Fishing: the Polionda® crates are an **ecological alternative to expanded polystyrene** ones.

Gardening: the Polionda® products can offer a number of uses, like in the handling and storage of vases. In addition, Polionda® corrugated polypropylene rolls are widely used to create irrigation channels and containment tanks in greenhouses.

Grains and seeds: the Polionda® **interlayer pads** are very common to stack safely the big bags.

Insect catch: **traps** in Polionda® and Ondaplaque treated with pheromones are becoming increasingly popular to capture bedbugs, flies, mosquitoes and other insects, especially in the organic crops.

SAMPLE APPLICATIONS:

1. Boxes for fruit, vegetables and fish
2. Shelters for tree plants
3. Polionda® sheets used in the packaging of vases
4. Containment tanks in Polionda® for nurseries (black clour)
5. Bird house
6. Insect trap
