

BUILDING

Advanced solutions in corrugated polypropylene

BUILDING

The Polionda sheets of Ondaplast allow a wide range of applications and solutions even in the world of construction, building in general and shipbuilding.

SHEETS FOR THE PROTECTION OF FLOORS AND WALLS

The Polionda sheet is particularly suited to be used for the protection of floors and walls from bumps and scratches inside construction sites, wheter they are building or naval.

With this product, developed specifically for this application, you can protect floors, stairs, walls, etc.

A variety of technical solutions are available to suit your operational needs.

Ondaplast sheets are also available in a flame retardant version, with LPCB certification (RE-FLAM)

PERIMETER SHEETS FOR CONSTRUCTION SITES

Ondaplast also produces sheets used to protect the external perimeters of construction sites.

These sheets, in addition to the usual characteristics of robustness, lightness and ease of installation, are also customizable to allow the use of surfaces as advertising spaces.

Ondaplast is able to print perimeter sheets in a high quality and in a flexible way according to the needs of its customers.

BEAMFORM BORDER SHEETS

Modern construction techniques increasingly use PP corrugated sheets for the construction of the foundations.

The advantages of Polionda sheets are many:

- The sheet remain in place, therefore maintenance and transport after use are not required, as in the case of wooden formworks
- The sheet, remaining in place, protect the foundations from humidity and act as thermal insulation
- They are robust, economical, versatile and easy to apply

SHEETS FOR LAYING UNDERFLOOR HEATING

is a special application, developed by Ondaplast that allows to optimize and make efficient the laying of pipes for floor heating.

On the plates are printed the references for the laying of the tubes, and these plates are supplied folded and packaged so as to make their handling easy.
